Hello,

I am a Certified Full Stack Java Developer Completed Master's in Full Stack Java Development from the Simplilearn Institute and armed with a track record of managing databases and deploying applications and software while conducting manual testing to ensure smooth business operations.

In my recent work experience as a Developer Intern at **Aegiiz Technologies**, I assisted with the technical development of 2+ applications and generated a new SQL database by collaborating with the development team. In addition to this, I proactively participated in 2+ client meetings on a weekly basis and delivered required documents to the clients.

I went through the required skills mentioned and it matches with the learning experience I have had as a part of my education.

Enclosed for your consideration is my resume. I would appreciate the opportunity to discuss my suitability and qualifications with you on call or in person.

Sincerely,

Anish Augustin C
